RESEARCH INTERESTS

- **Vision–Language Models (VLMs)** [2, 4]: Spatial and temporal reasoning, perspective taking, 3D world understanding, and diagnostic benchmark design for multimodal models.
- **Large Language Models (LLMs)** [5, 6]: Safety, alignment, and responsible AI, including reasoning-based safety mechanisms.
- **Embodied AI & Reinforcement Learning** [1, 3, 7, 8, 9, 10, 11, 12, 13]: Learning and control for embodied agents, with a focus on robust decision-making, adaptability, and safety in dynamic real-world environments.

EDUCATION

Carnegie Mellon University

Ph.D. in Mechanical Engineering, Robotics focus, Safe AI Lab

Pittsburgh, USA

Aug. 2022 - May 2027 (expected)

Shanghai Jiao Tong University

B.Eng., Automation, School of Electronic Information Electrical Engineering

Shanghai, China

B.Eng., ZhiYuan Honors Program, Zhiyuan College

Sept. 2018 - June 2022

WORK EXPERIENCE

Waymo LLC

Research Intern

Mountain View, CA

May 2026 - Aug. 2026

On-Policy Self-Distillation for End-to-End Vision-Language-Action Driving Models

- Investigated on-policy self-distillation (OPSD) as a post-training method for driving VLA.
- Identified an off-support teacher-supervision gap and characterized how supervised fine-tuning concentrates the student’s output distribution.

Mitsubishi Electric Research Laboratories (MERL)

Research Intern

Cambridge, MA

May 2025 - Aug. 2025

- Proposed **SpinBench**, a diagnostic benchmark for spatial reasoning in VLMs (ICLR 2026).
- Conducted large-scale evaluation of **43+ VLMs** across spatial transformation tasks.
- **Fine-tuned InternVL** on curated data, improving spatial reasoning performance.

Mitsubishi Electric Research Laboratories (MERL)

Research Intern

Cambridge, MA

May 2024 - Aug. 2024

- Developed distributional risk-aware policy for quadrupedal robot locomotion.
- Proposed bipedal locomotion for quadrupedal robots to enable flexible loco-manipulation.

Flexiv Robotics Inc.

Robotic Vision Intern

Shanghai, China

Dec. 2021 - Mar. 2022

- 3D reconstruction and point cloud registration.
- Point cloud feature extraction and visual fixture generation for interactive teleoperation.

RESEARCH EXPERIENCE

Safe AI Lab

Ph.D Candidate

Carnegie Mellon University

Aug 2022 - present

SpinBench: Perspective and Rotation as a Lens on Spatial Reasoning in VLMs [2]

- SpinBench is a cognitively grounded diagnostic benchmark for evaluating spatial reasoning in vision language models (VLMs).
- SpinBench targets translation, rotation, object relative pose, and viewpoint change.
- Progressively structured: single-object tasks scaffold toward multi-object perspective-taking tasks.

Safety is Not Only About Refusal: Reasoning-Enhanced Fine-tuning for Interpretable LLM Safety [5]

- Proposed a novel framework that trains models to engage in explicit safe reasoning before response.
- Reasoning is not only a key component of model capability but also powerful for safety alignment.

QuietPaw: Learning Quadrupedal Locomotion with Versatile Noise Preference Alignment [7]

- Proposed a conditional RL framework for noise-constrained locomotion.
- A decomposed value estimation approach that improves Pareto-optimality.

Bipedalism for Quadrupedal Robots: versatile loco-manipulation through risk-adaptive RL [8]

- Proposed a risk-adaptive RL framework for the robust bipedal locomotion of quadrupedal robots
- Introduced an uncertainty metric based on the return distribution for risk awareness
- Robust loco-manipulations with cart pushing, contact-aware obstacle probing, payload carrying

COMPOSER: scalable and robust modular policies for snake robots [9]

- Proposed a modular policy with a self-attention mechanism to enhance cooperative behaviors
- Demonstrated superior efficiency, robustness against corruption, and zero-shot generalizability.

Mechanical Systems Control Lab
Undergraduate Researcher

University of California, Berkeley
June 2021 - Nov. 2021

Offline-online learning of deformation model for cable manipulation with graph neural networks [10]

- Combined offline graph neural network with online residual model to approximate cable dynamics
- Improved model training efficiency and generalizability, narrowed sim-to-real gap.

Intelligent Robotics and Machine Vision Lab
Undergraduate Researcher

Shanghai Jiao Tong University
Sept. 2020 - June 2022

Safe Vision-based contact selection for the non-fixed contact manipulation of deformable objects[13]

- Proposed a stabilizing and optimization strategy to select initial manipulation contact points
- Designed an uncalibrated visual servo controller to validate the contact optimization strategy

Hybrid vision-force control for robotics manipulation in confined space[12]

- Developed an adaptive method to estimate Jacobian matrixes in force space and image space
- Designed a hybrid vision-force controller for manipulation with a desired contact force

Adaptive visual servoing shape control of a soft robot manipulator using Bézier curve features[11]

- Proposed an adaptive Bézier curve update algorithm to represent soft continuum robots
- Designed an uncalibrated visual servo controller for shape regulation of the soft continuum robot

TECHNICAL SKILLS

ML: Vision–Language Models, Large Language Models, Multimodal Learning, Model Evaluation, Fine-tuning, Benchmark Design, Reinforcement Learning, Distributional RL, Imitation Learning

Frameworks: PyTorch, HuggingFace

Robotics: Locomotion, Loco-manipulation, Visual Servoing

AWARDS

- CMU Graduate Student Assembly Travel Grants for ICRA 2024
- Carnegie Institute of Technology Dean’s Fellowship, 2022
- Shanghai Outstanding Graduate, Top 2.5%
- Zhiyuan Honors Degree, Top 1.5%
- Zhiyuan Honors Scholarship, 2018, 2019, 2020, 2021, Top 5%
- Undergraduate Excellence Scholarship 2018, 2019, 2020, 2021
- The Mathematical Contest in Modeling: Meritorious Winner, Top 3%
